

Report of IETE Conference On

66th Annual IETE convetion (AIC)

Name of Event:	66th Annual IETE convetion (AIC)
Organized Under:	IETE Student Forum (ISF) New Delhi
Date of Event:	September 16 -17, 2023
Location of Event:	Yashwantrao Chavan Academy of Development Administration (YASHADA)
Number of persons Attending:	2000
Sponsoring Organization:	JSPM'S BSIOTR AND IETE New Delhi
Program Director Name:	Dr. T.K Nagaraj Sir
Vist Co-Ordinator Name:	Dr. Y.S. Angal Sir

Highlights of the session:

1. Paper Selection: A total of 105 papers were submitted for presentation at the conference. The selection committee rigorously evaluated these submissions, ultimately choosing 30 papers for presentation.
2. Representation of the College: Of note, one of the papers chosen for presentation was written by a student from our college. This accomplishment demonstrated the excellent calibre of academic brilliance and research at our university. Particularly, one team of college students from our institution was essential to the publishing of the work titled "Automatic Sunlight Tracker Using Arduino .

The report that follows describes the outstanding accomplishment of university students who have been invited to participate as authors and present a paper at the 66th Annual IETE Convention in Pune. This accomplishment serves as a monument to the value of cutting-edge technology in addressing major global challenges as well as to the commitment and skill of the students who achieved it.

Ashutosh Thakur, Pratik Tale, and Anteshwar Yenge's paper, "Automatic Sunlight Tracking using Arduino," has received widespread acclaim after being published in three esteemed national and international journals. This success highlights the value of student research in tackling some of the most urgent problems facing the globe, especially in the fields of automation and renewable energy sources.

Using the idea of automatic solar tracking with an Arduino, this paper explores the exciting state of automation and sustainable energy solutions. The use of solar energy could be transformed by this creative strategy, making it more practical and affordable.

The ability for students to connect and engage with ISRO scientists as well as other well-known national figures is one of the program's most notable features. These exchanges have improved our students' comprehension and given them priceless insights into the enormous potential of engineering and technology to advance society. The depth and importance of the students' research have surely increased as a result of the knowledge and ideas they have shared with these outstanding brains.

At the Annual IETE Convention, a crucial platform for technology and engineering professionals, Ashutosh Thakur not only presented their paper but also delivered a presentation, further demonstrating the practical applications of their research.

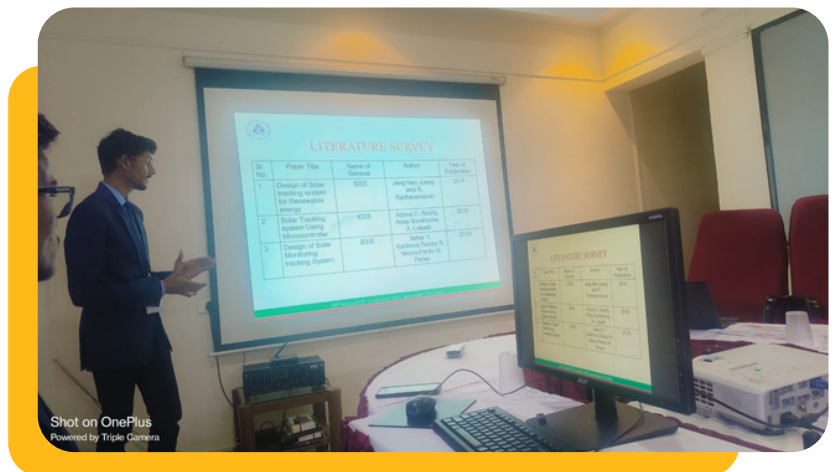

The convention provides a unique opportunity for like-minded individuals to exchange ideas, explore cutting-edge technology breakthroughs, and foster meaningful collaborations.

Our college students would like to express their gratitude to Dr. Yogesh Angal sir for guiding them as well as to the JSPMS BSIOTR management team and staff members who have helped them along the way.

A beautiful opening ceremony for the IETE conference started.

Ashutosh Thakur performed the paper presentation.

Pratik Tale and Anteshwar Yenge awarded certificates for the paper's publication.

The honourable chairperson rewarded Ashutosh Thakur with certificates for the presentation of the paper.

Ashutosh Thakur was awarded certificates for the paper's publication.

A scientist from ISRO meets with college students. Photo taken with Dr. Uma Devi, an ISRO scientist who worked on Chandrayan-3 and gave some helpful advice.

Dr. Reddy, the defence minister, gave students warm career wishes.

College students had the opportunity to meet the president of IETE Hyderabad.

OUTCOMES:

1. Attendees would have discussed and learned about the most recent advancements in engineering and technology, including new trends and developments.
2. Participants would have had the chance to make worthwhile professional connections that could result in future partnerships and collaborations.
3. The conference might have generated creative concepts that could result in fresh projects or initiatives in the engineering and technology fields.
4. The accomplishments and ideas given by speakers and other attendees may have motivated and inspired attendees.

This Conference was organized by IETE Delhi and IETE Pune under IETE Student forum (ISF)

Sr.no	Name of Students	Expenses	Cost(In Rs)
1.	Ashutosh R. Thakur	Registration fees (Author)	1500/-
2.	Pratik S. Tale	Registration fees (Co-Author)	1000/-
3.	Anteshwar N. Yenge	Registration fees (Co-Author)	1000/-
	TOTAL		3500/-
